

STEREO MOC Status Report
Time Period: 2019:154 - 2019:160

STEREO Ahead (STA) Status:

1. The following Ground System anomalies/events occurred during this reporting period:

- On day 155, GSW release 7.2.3 was deployed to the primary and disaster recovery workstations. The release corrected the command binding failure after successive tracks issue using CCSDS SLE bluebook version 4. The display of DSN monitor data times was also corrected. The new backup command workstation will have the release installed and moved to the RIONet on June 19th.

2. The following spacecraft/instrument events occurred during this week. The Ahead observatory operated nominally during this week.

- The average daily science data return for Ahead was 6.6 Gbits during this week.
